

Get ready for your dropZone VIP Workshop

1

Is your AIS Server installed and up and running for the environment you'd like to use for the VIP Workshop? Have the URL of the AIS Server available.

2

Have your JDE Edwards User and Password ready.

3

Have your dropZone User and Password ready (you will receive this in a separate Mail after your registration).

4

You'd like to do some more testing before the workshop?

Sign on to dropZone with your dropZone User.

Verify that there is a Tab "Configuration" at the top. Click it and enter your JDE user and password as well as your AIS URL (without http:// or https://) and click on SUBMIT to Connect.

That's it!

NOW YOU ARE READY TO GO!
